

State Extract Validation Requirement For Outcomes - Dispositions

In order to satisfy the State / NEMSIS Extract Requirements for “Refusal of Care / AMA”, “Refusal of Care after Treatment” or “Field Pronounce, DNR, or Scene Death”, and any other Outcomes where a Destination Facility **is not** entered. There are three fields where “**Not Applicable**” is required as the value. Single click using the “**Red Button**” on each field (it will not accept any other values). If you start with the “Facility Name”, it will automatically advance to the next two required fields each time you click the red button....

Facility Name	∅:Not Appli...	
Hospital Designation	∅:Not Appli...	

- **Outcome > Outcome Tab > Drop Off Section** (towards the bottom of Outcome)
 - Facility Name = “**Not Applicable**”
 - Hospital Designation = “**Not Applicable**”
 - Hospital In Patient Destination = “**Not Applicable**”

State

- **Example** of Rule Description (1 of the 3) required... if there is nothing in the fields, you would have to go to them directly to enter the values. It may or may not turn red depending on the current value.
 - It is recommended when entering the “Disposition – Outcome” for the patient that you scroll down to the “Drop Off” section shown in screenshot above and enter the “Red Button” “Not Applicable” values before leaving that section
